**“Odd/ Even” Outdoor Water Restrictions for**

**Narragansett and South Kingstown (SUEZ Water Rhode Island and Town) Water Customers**

As a result of recent summertime heavy consumer demand, SUEZ Water- Rhode Island, and the Towns of South Kingstown and Narragansett have announced restrictions on outdoor water use for the following water system customers:

- SUEZ Water- Rhode Island water system customers
- Town of South Kingstown South Shore and Middlebridge water system customers
- Town of Narragansett – all water system customers

Please note that these restrictions do not affect Kingston Water District customers.

Effective immediately, each water utility is imposing an outdoor water use ban on alternate odd and even days. Customers with an odd number street address may water only on odd number weekdays, while customers with an even number street address may water only on even number weekdays.

This watering restriction is being enacted to ensure sufficient supply to meet customer needs. In addition, water customers are encouraged to use water wisely.
