Re: Use of Force Reports 2022

Chief,

I have completed a review of the Response to Resistance/Non-compliance Reports that were filed in 2022. Below is a list of information that was gathered from these reports. I have reviewed the details of each incident to document the presents trends. After reviewing the incidents involving use of force, my conclusion is that there are no patterns that are evident or misuses of force that would require re-training or any further analysis.

Our present use of force reporting and command structure requires the following: Officers must complete a Response to Resistance/Non-Compliance Form in addition to their incident/arrest report. The incident narratives and Response to Resistance/Non-Compliance Forms are reviewed by a shift supervisor. The Response to Resistance/Non-Compliance Forms are then forwarded to the Office of Professional Standards for review and approval. This approval is documented as a Response to Non-Compliance Guardian Entry. Supervisors are required to immediately report any non-policy compliant use of force incidents to the Administrative Captain. Follow-up investigations are conducted and documented when warranted.

The Response to Non-Compliance Guardian entries are tracked as part of the department's Early Warning System. In 2022, there were no Response to Non-Compliance/Use of Force Early Warning System indications.

There were a total of fifteen (15) Response to Non-Compliance entries into Guardian and a total of nine (9) Response/Non-Compliance Forms completed. The reason for the disparity in numbers is due to events where multiple officers were involved.

Whereas each officer involved in a Use of Force event requires a separate Guardian entry, one Response/Non-Compliance Form is required to be completed for each incident. In the above mentioned incidents where force was used, five of the incidents involved two or more officers, whereas four incidents involved a single officer.

OC Spray was deployed on three occasions having its desired effect on two combative individuals. In the third incident, OC was ineffective and officers had to transition to the Taser which was effective.

The Taser was brandished in one incident but not deployed. It was deployed in two other incidents on combative, disruptive individuals having its desired effect.

One of the departments K9's, Napoleon, was deployed on one occasion to subdue a combative individual actively fighting with police. This incident involved a large disturbance in which officers were heavily outnumbered. The use of the K9 was effective and several individuals were taken into custody.

Firearms were brandished only, on two separate occasions. One occasion was due to a felony car stop. The other involved a disorderly subject with a rifle. No shots were fired at any point, and all subjects were taken into custody without injury.

Physical force was used on six different occasions with only complaints of minor injuries that were documented correctly and given medical attention by Narragansett Fire/Rescue or South County Hospital as needed.

All of the above mentioned incidents were policy compliant. The determination of compliancy was based on information contained in Narragansett Police Department Policies to include: 301.01 Use of Force, 310.07 Taser Deployment, 310.02 Oleoresin Capsicum Spray, 370.07 Emergency Restraint Chair and 365.02 Canine Policy.

After reviewing these matters, it appears all Use of Force incidents are being documented correctly with no patterns of misuse that would require re-training.

Respectfully submitted,

Captain Kyle Rekas
